

Vermenigvuldigen: de tafel van 41. De tafel van 4 is verwant (familie) met de tafel van 2:

$2 \times 2 = 4$ of $1 \times 4 = \underline{\quad}$

$4 \times 2 = 8$ of $2 \times 4 = \underline{\quad}$

$6 \times 2 = 12$ of $3 \times 4 = \underline{\quad}$

$8 \times 2 = 16$ of $4 \times 4 = \underline{\quad}$

$10 \times 2 = 20$ of $5 \times 4 = \underline{\quad}$

Overige onderdelen van de tafel van 4:

$6 \times 4 = \underline{\quad}$ $7 \times 4 = \underline{\quad}$ $8 \times 4 = \underline{\quad}$ $9 \times 4 = \underline{\quad}$ $10 \times 4 = \underline{\quad}$

2. Vindt de buren van de getallen van de tafel van 4:3. Voor elke goed opgeloste som krijg je één punt:

$6 \times 4 = \underline{\quad}$

$4 \times 4 - 10 = \underline{\quad}$

$3 \times 4 = \underline{\quad}$

$2 \times 4 + 8 = \underline{\quad}$

$9 \times 4 = \underline{\quad}$

$7 \times 4 - 3 = \underline{\quad}$

$5 \times 4 = \underline{\quad}$

$5 \times 4 + 1 = \underline{\quad}$

$0 \times 4 = \underline{\quad}$

$1 \times 4 + 7 = \underline{\quad}$

$8 \times 4 = \underline{\quad}$

$8 \times 4 - 5 = \underline{\quad}$

$2 \times 4 = \underline{\quad}$

$6 \times 4 + 6 = \underline{\quad}$

$10 \times 4 = \underline{\quad}$

$9 \times 4 - 3 = \underline{\quad}$
